உுக நுகப் மூன்று மணித்தியாலம் Three hours අමතර කියවීම් කාලය - මිනිත්තු 10 යි ගෙහනිය வாசிப்பு நேரம் - 10 நிமிடங்கள் Additional Reading Time - 10 minutes

Use additional reading time to go through the question paper, select the questions and decide on the questions that you give priority in answering.

## Information & Communication Technology I

## Note:

- \* Answer all questions.
- \* In each of the questions 1 to 40, pick one of the alternatives (1), (2), (3), (4) which is correct or most appropriate.
- \* Mark a cross (X) on the number corresponding to your choice in the answer sheet provided.
- \* Further instructions are given on the back of the answer sheet. Follow them carefully.
- 1. Which of the following devices have both input and output capabilities?
  - (1) joystick
- (2) OCR Device
- (3) touch screen
- (4) webcam
- 2. Which of the following can be a good practice to protect data and information from computer hard disk failures?
  - (1) installing a firewall

- (2) installing an antivirus software
- (3) taking periodic backups
- (4) using a strong password
- 3. Which of the following is correct regarding the generations of computers?
  - (1) Integrated Circuits (ICs) were introduced in 1st generation computers.
  - (2) Vacuum tubes were introduced in 2<sup>nd</sup> generation computers.
  - (3) Transistors were introduced in 3<sup>rd</sup> generation computers.
  - (4) Very Large Scale Integrated Circuits (VLSI) were introduced in 4th generation computers.
- 4. Which of the following are related to G2C (Government to Citizen) services in Sri Lanka?
  - A viewing G.C.E. (O/L) results online
  - B ordering food items online
  - C renewing vehicle revenue licenses online
- (1) A only
- (2) A and C only
- (3) B and C only
- (4) all A, B and C
- 5. Which of the following is an example for data processing?
  - (1) calculating the account balance using banking software after a cash withdrawal
  - (2) copying a file from a USB drive to a hard disk of a computer
  - (3) installing sound editing software in a personal computer
  - (4) scanning a letter using a scanner

[see page two

OL/2	2019/80/E-I, II		2 -	
6.	Select the most suitable computer, for the follow		a super computer,	a laptop computer and a tablet
	B - for a writer to v	large amounts of data work on an essay duri les representative to en	ing a vacation away	
	<ol> <li>A: laptop computer,</li> <li>A: laptop computer,</li> <li>A: super computer,</li> <li>A: tablet computer,</li> </ol>	B: tablet compute B: laptop compute	er, C: super co	omputer
7.	Consider the following	statement with blanks	labelled (A) and (B)	to the second second of
	When processing, the C. from	PU uses its	to tempora	rily store data that are brought
	Which of the following (1) primary memory, reg (2) registers, primary me (3) secondary memory, (4) secondary memory,	gisters emory primary memory	le to fill the blanks	labelled (and (B) respectively?
8.	Which of the following	are correct regarding	transmission media	?
	over 200 m. B - Fiber optic cable	s transmit data faster	than UTP cables.	ransmit data for long distances ommunicate with computers.
				(4) all A, B and C
9.	Which of the following	statements are true?		
		used to store data and umber both in the oc to 100001010 <sub>a</sub> .		
		4	A and C only	(4) all A, B and C
10.	<ul><li>(1) cache memory, mair</li><li>(2) hard disk, cache me</li><li>(3) register, cache memory</li></ul>	memory, register, ha mory, register, main r ory, main memory, ha	rrd disk memory rrd disk	escending order of access speed?
	(4) register, main memo			
11.	character 'G' in the AS	CII table?	table as $69_{10}$ , what $3) 1001000$	is the binary representation of (4) 1001001
12.	Which of the following (1) payroll management (2) process management	process management	, file management	system?
	(3) process management	, memory managemen	nt, database manage	ment

- (4) process management, memory management, file management
- 13. Which of the following techniques can be used to increase the free space of a hard disk without deleting any existing files?
  - (1) compression of existing files on the hard disk
  - (2) copying some files in the hard disk to a flash drive
  - (3) formatting of the hard disk
  - (4) partitioning of the hard disk

[see page three

14.	While editing a document using a word processing software, you decide to copy	a selected part
	of the document to another document. Which of the following key combinations	will enable you
	to carry out this task?	Service and Company

(1) Ctrl + C followed by Ctrl + V

(2) Ctrl + N followed by Ctrl + V

(3) Ctrl + P followed by Ctrl + V

(4) Ctrl + V followed by Ctrl + C

15. Consider the range of cells given as (A3:C4) in a spreadsheet. Which of the following cells are included in this range?

(1) A3 and C4 only

(2) A3, B3 and C3 only

(3) A3, A4, C3 and C4 only

(4) A3, B3, C3, A4, B4 and C4 only

16. Consider the following spreadsheet segment with the formula =B2 \* B\$5 written into cell C2:

1	Name	Sales (Rs)	Commission (Rs)
2	A. Dias	50000	5000
3	B. Sivarajah	60000	a seed plant
4			
5	Percentage:	0.1	

What would be displayed in the cell C3 if the formula in cell C2 was copied to cell C3?

(2) 5000

(3) 6000

(4) 60000

17. You want to add a blank slide to an electronic presentation that you are editing. Which of the following key combinations can be used for this purpose?

(1) Ctrl+M

(2) Ctrl+N

(3) Shift+B

(4) Shift+V

18. Which of the following features of electronic presentation software can be used to change the content arrangement of a slide from Arrangement 1 to Arrangement 2?

Arrangement 1

Arrangement 2

(1) Slide layout

(2) Slide show

(3) Slide sorter (4) Slide view

19. Which of the following is not a common feature of both word processing and electronic presentation software?

(1) changing line space

(2) find and replace

(3) mail merge

(4) spell checker

20. Which of the following is suitable in order to improve the quality of an electronic presentation?

A - limiting the number of text lines on a slide to between 6 and 9

B - not having a large number of pictures and graphs on a single slide

C - using a lot of red colour on every slide

(1) A and B only

(2) A and C only

(3) B and C only (4) all A, B and C

Questions 21 to 24 are based on the following partly shown database tables that are used to store data about books, students, and books reserved by students in a school library.

Table: Book (Contains the details of books and whether each book is reserved or not.)

Book_ID	Title	Reserved
B0001	Effective Writing	TRUE
B0002	Classic Short Stories	TRUE
B0003	Poem Writing	FALSE
B0004	Vocal Theory	TRUE

Table: Student (Contains details of all students in school and whether each student is a library member

Student_Name	Student_ID	Grade	Library_Member
Piyal	1001	7	TRUE
Kumar	1002	9	TRUE
Ismail	1003	8	TRUE
Sunil	1004	10	FALSE
Sarath	1005	7	TRUE

Table: Reservation (Contains details about books reserved by students.)

Student_ID	Reserved_Date	Book_ID
1003	02/03/2019 B0	
1002	23/04/2019	B0001
1005	16/06/2019	B0004

21. How many fields are in the Student table?

(1) 2

(2) 3 "

(3) 4

(4) 5

22. What would be an example of a foreign key in the database?

(1) Book\_ID in Reservation table

(2) Grade in Student table

(3) Reserved\_Date in Reservation table (4) Title in Book table

23. What is the title of the book reserved by Kumar?

(1) Classic Short Stories

(2) Effective Writing

(3) Poem Writing

(4) Vocal Theory

- 24. A student gets the library membership and reserves a book. What tables need to be updated for this purpose?
  - (1) Book table and Reservation table
  - (2) Book table and Student table
  - (3) Reservation table and Student table
  - (4) Book table, Reservation table and Student table
- 25. Which of the following shows the correct order of testing a software system?
  - (1) acceptance testing, integration testing, unit testing, system testing
  - (2) system testing, integration testing, acceptance testing, unit testing
  - (3) unit testing, acceptance testing, system testing, integration testing
  - (4) unit testing, integration testing, system testing, acceptance testing
- 26. Every web page on the World Wide Web (WWW) has a unique identifier called the
  - (1) email address.
- (2) hyperlink.
- (3) IP address.

(4) URL.

27. Which of the following combinations contains only Internet related protocols?

(1) FTP, HTML, HTTP, SMTP (2) FTP, HTML, HTTP, TCP/IP

(3) FTP, HTTP, SMTP, TCP/IP

(4) HTML, SMTP, TCP/IP, URL

[see page five

OL/2	19/80/E-I, II - 5 - 20583
28.	Which of the following combinations represents only the services of the Internet?  (1) email, file sharing, remote access, streaming of media  (2) email, file sharing, streaming of media, web browsers  (3) file sharing, HTML codes, remote access, search engines  (4) remote access, search engines, streaming of media, web browsers
29.	Consider the following list rendered by a web browser:  Science  Maths  English  Which of the following HTML tags are required to create the above list?  (1) <dl>,<dt> (2) <dl>,<li> (3) <ol>,<li> (4) <ul>,<li> (4) <ul>,<li> (5) <ul></ul></li></ul></li></ul></li></ol></li></dl></dt></dl>
30.	Which of the following statements related to web page development are correct?  A - The content shown in dynamic web pages may vary according to user inputs or time.  B - Dynamic web pages are created only using HTML.  C - Web authoring tools can be used to create web pages.  (1) A and B only (2) A and C only (3) B and C only (4) all A, B and C
31.	Which of the following tags can be used for HTML character formatting?  (1) <i>, <b>, <u>, <em> (2)   (3) , <li>, <b>, <u>,  (4) <i>, <b>, <li>, <em> (5)  (6)  (7)  (8)  (9)  (10)  (11)  (12)  (13)  (14)  (15)  (15)  (16)  (16)  (17)  (17)  (18)  (</em></li></b></i></u></b></li></em></u></b></i>
32.	Which of the following is the correct posture to use when using a computer?
33.	(1) (2) (3) (4) How many bits per pixel (bpp) are required to represent 32 colours?
34.	(1) 4 (2) 5 (3) 6 (4) 7  What would happen to an image if its <i>resolution</i> is <b>decreased</b> ?  (1) quality and the file size of the image increases (2) quality and the file size of the image decreases (3) quality increases while the file size of the image decreases (4) quality decreases while the file size of the image increases
35.	<ul> <li>Which of the following statements are true?</li> <li>A - Pascal is an example of a high-level programming language.</li> <li>B - High-level language programs are easier for the programmers to understand than low-level language programs.</li> <li>C - A compiler translates a high-level language program into machine language instructions</li> <li>(1) A and B only</li> <li>(2) A and C only</li> <li>(3) B and C only</li> <li>(4) all A, B and C</li> </ul>
36.	Consider the following pseudo-code segment:  BEGIN  READ units  IF units <= 50 THEN  amount = units*1  ELSE  IF units > 50 AND units <= 150 THEN  amount = 50 + (units - 50)*2  ELSE
	amount = $250 + (units - 150)*5$

ENDIF ENDIF DISPLAY amount

What would be the output if the value 175 is input for the variable units?

(1) 175

(2) 250

(3) 300

(4) 375

37. What would be the output if a user inputs the numbers 4, 5, 2, -1 one after the other for the following pseudo-code segment?

terminal = -1

x = 0

REPEAT

DISPLAY "Enter number"

GET num

IF num>x THEN

x = num

**ENDIF** 

UNTIL num = terminal

DISPLAY x

(1) -1

(2) 0

(3)

(4) 5

38. Consider the following statements regarding computer programs:

A - Variables can contain different values at different times.

B - Reserved words of a programming language can be used as variable names in that language.

Which of the following is true with respect to the above?

(1) Only A is correct.

(2) Only B is correct.

(3) Both A and B are correct.

(4) Both A and B are incorrect.

39. Consider the following pseudo-code:

READ a, b, c

value = 0

IF (a>b) THEN

IF (a>c) THEN

value = a

**ELSE** 

value = c

ENDIF

**ENDIF** 

DISPLAY value

If the values input for the variables a, b and c are 50, 30 and 70 respectively, what would be the displayed output?

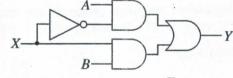

(1) 0

(2) 30

(3) 50

(4) 70

**40.** If 0 and 1 respectively are given as inputs for X in the following logic circuit, what would be the two respective outputs at Y?

(1)  $A, \bar{B}$ 

(2) A, B

(3)  $B, \bar{A}$ 

(4) B, A

## Information & Communication Technology II

- \* Answer five (05) question's only, including the first question and four others.
- \* First question carries 20 marks and each of the other questions carries 10 marks.

I. II

- (i) The Colombo Weather Centre records daily rainfall values for one month.
   Write down two examples for information that can be found by processing the above mentioned daily rainfall data.
  - (ii) Consider the following diagram with images of some computer ports labelled A-E.

Image of the port	000		The second	A STREET MEANING	
Label	A	B	©	<b>©</b>	E

Identify the name of each port using the list given below. Write down the label of each port and its matching port name.

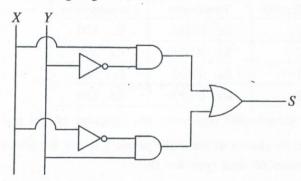

List: {Audio, HDMI, RJ45, USB, VGA}

- (iii) (a) Convert 1260<sub>10</sub> to its octal equivalent.
  - (b) Convert A1<sub>16</sub> to its binary equivalent.
- (iv) (a) Consider the following logic gate.

Draw the truth table (having two columns as A and P) for the above gate.

(b) Consider the following logic circuit.

Write down the relevant boolean expression for S.

[see page eight

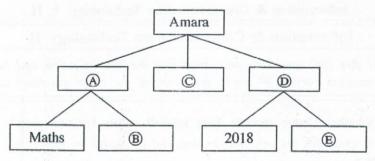

(v) Amara wants to create a folder (directory) structure to store files methodically in his computer. He wants separate folders for his study related files of the subjects Maths and Science. He also wants to store all his music files separately. He further wants to store all the photos that he had taken in 2018 and 2019 separately.

The following diagram shows the folders and sub-folders created by Amara. Write down the folder names indicated by the labels  $\bigcirc - \bigcirc$  choosing from the given list.

List: {2019, Music, Photos, Science, Studies}

(vi) Some formatting done to a word-processed text is shown below:

Randenigala 

B

With a catchment area of 2,330 km², it is one of the largest reservoirs in Sri Lanka. Some of its measurements are as follows:

 $\mathbb{Q}$ 

- Length of the dam 485 m
- Surface area of the reservoir 13.5 km<sup>2</sup>

Following are some tool icons of a word processing software:

Formatting icon	2		3	ab	26	:=	15
Label	P	0	®	(S)	T	0	<b>(V)</b>

Identify the formatting tools, indicated by the labels  $\mathbb{P} - \mathbb{V}$  required to do the formatting tasks indicated by the labels  $\mathbb{A} - \mathbb{D}$ . Write down the label of each formatting task and its matching tool icon label.

(vii) Consider the following database table listing monthly sales and commissions of sales representatives;

Month	SalesRepID	TotalSales	Commission
January	1	Rs. 10,000	Rs. 100
January	2	Rs. 20,000	Rs. 200
February	1	Rs. 5,000	Rs. 50
February	2	Rs. 15,000	Rs. 150

Note: In the above table, SalesRepID represents the identifier of the sales representative.

- (a) Which **two** fields should be chosen to make the *primary key* of the above table?
- (b) Write down the most suitable data type for the:
  - (1) Month field
  - (2) TotalSales field

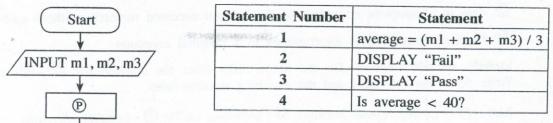

[see page nine

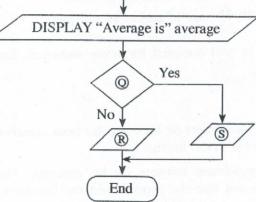

(viii) Following flowchart is used to input marks of three subjects. Then it calculates and displays the average of those marks, and the pass/fail status. To be considered for a pass, the average should be greater than or equal to 40.

Identify the correct statement for each of the labels P, Q, R and S in the flowchart from the table given below. Write down each label and its matching statement number.

- (ix) Choosing from the two words given within parentheses, select the suitable word that should be used to fill in each blank of the following statements labelled  $\bigcirc -\bigcirc$ . In your answer, write only the statement label and the selected word for the blank.
  - A tiny illuminated dot of white, black, or any other colour, which is displayed on a computer screen is called a ...... (bitmap, pixel).

  - © ...... (Lossy, Lossless) compression reduces the quality of the image.
  - D ...... (GIF, JPEG) is an example for a lossless file format.
- (x) Kamal sent an e-mail message to Hameed, Meena, Sharma and Gihan as shown by the email header given below.

To:	hameed, meena
Cc:	sharma
Bcc:	gihan

Write down whether the following two statements labelled (A) and (B) are True (T) or False (F). (In your answer, write the statement label and the T/F status.)

- A Gihan can see that Hameed is a recipient.
- B Sharma can see that Gihan is a recipient.

[see page ten

- 2. (i) Some information technology related risks (labelled A-D) are given below.
  - A losing user files and folders due to a hard disk failure
  - ® computer behaving abnormally after the use of a flash drive
  - © data in a computer connected to the Internet accessed remotely without authorization
  - (D) frequent power supply interruptions to a personal computer

Identify suitable solutions for the above risks from the labelled list  $(P - \overline{U})$  given below. Write down the risk label and the matching solution label.

List: {\mathbb{P} - getting regular backups, \mathbb{O} - installing CCTV, \mathbb{R} - installing firewalls, \mathbb{S} - use of surge protectors, \mathbb{T} - use of UPS, \mathbb{O} - use of anti-virus software}

- (ii) The 3R (Reduce, Reuse and Recycle) technique is well accepted for waste reduction. Explain this technique with respect to reducing e-waste.
- (iii) Write answers for the following:
  - (a) Write one way in which a person can protect a spreadsheet on his computer from unauthorized access. (Assume that the computer is not connected to the Internet.)
  - (b) A person cannot afford to buy commercial spreadsheet software for his computer. He has to use spreadsheet software often and he does not like the expense and the inconvenience of going to an ICT center each time for it. Suggest one thing that he could do fulfill his spreadsheet requirements.
  - (c) To facilitate student learning, a school principal wants to start a Learning Management System (LMS) in her school using an unused, new computer. Write down one benefit that students can obtain through this LMS.
  - (d) Explain how a student can include in his essay without plagiarizing, a part of the content of a website.
  - (e) A manager in a Colombo office wants to have a meeting with managers in Jaffna and Matara offices using a video conference. Write down the requirements that are needed in these locations in order to use this facility.
- (iv) An office wants to create a computer network using a hub, three computers (named server, computer A, computer B) and a printer using a star topology.
   Using named boxes for the devices (e.g., hub), draw a diagram to illustrate the above topology for the office.

3. Following are the partly shown tables of the relational database of a sports team management system in a school.

PlayerID	FirstName	LastName	StudentID
P1001	Saman	Perera	S1538
P1002	Raj	Selvam	S1201
P1003	Sharaf	Nazwar	S2735
P1004	Saman	Silya	S1465
P1005	Shane	Almaida	S2905
P1006	Nimal	Fernando	S1350
:			
:			and west settle

Table: Player (Includes the descriptions of players)

TeamID	PlayerID	<b>YearJoined</b>
T1	P1002	2013
T1	P1004	2014
T2	P1003	2015
T2	P1005	2015
T3	P1001	2014

:		SESSE DESIGNATION	

Table: Team

(Contains the names and age categories of teams and their captains)

(Note: CaptainID is a valid PlayerID)

- (i) (a) Write down the primary key of the Team table.
  - (b) Write down the possible primary keys available in the Player table.
- (ii) Which table(s) need(s) to be updated to accommodate the following changes?
  - (a) A new student, Piyal Alwis (StudentID: S4205), is admitted to the school and joins the U17 Cricket team in 2019.
  - (b) Nimal Fernando is appointed the captain of the U19 Volleyball team.
- (iii) (a) Write down the new record(s) to be added to the relevant table(s) for the change mentioned in part (ii) (a). Use the format: tablename → (field1, field2, ...) for each record.
   (Note: Assume that Piyal Alwis is assigned the PlayerID P1120)
  - (b) In 2019, the school starts an Under 17 (U17) Football team (**TeamID**: T7) and appoints Shane Almaida as the captain. Write down the new record(s) to be added to the relevant table(s) for the above change. Use the format: tablename → (field1, field2, ...) for each record.

(Note that Shane Almaida is currently playing in the U17 Cricket team.)

(iv) Which tables are to be joined to write a query to find the name of the U19 Cricket captain?

[see page twelve

4.	(i)	Consider the following	g statements	s with	blanks la	abelled	A-F.	Identify	the mos	t suita	able
		term to fill each blan									
1		matching term.									

A - ...... determines the correspondence between domain names and IP addresses on the Internet.

- © ...... is one of the most important protocols for email transport between email servers.
- D ..... is the top level domain of the domain name www.nie.lk.
- E ..... could be used to find out web pages whose URLs are not known.
- F ..... separates the user name and domain name of an email address.

List: {# symbol, @ symbol, DNS service, FTP, HTTP, ICMP, IP address, IP service, lk, nie.lk, Search engines, SMTP, URL}

- (ii) Choosing from the examples given in the list, write down the correct example for each of the labelled items (a) to (b) given below. You are only required to write the label and the corresponding example.
  - A web browser
  - B programming language for dynamic web content creation
  - @ web authoring tool
  - D content management system

List: {Joomla, Kompozer, Mozilla Firefox, Pascal, PHP}

(iii) The HTML source of the web page shown in Figure 1 is given in Figure 2 with certain missing tags labelled ① to ⑩.

## Dengue fever: What is it and how to stop it?

Dengue fever is a mosquito borne viral infection that causes a flu-like illness.

It can worsen into severe dengue and become deadly if not treated well.

Currently about one-third of the world's population is at risk of contracting dengue fever.

Dengue fever signs, symptoms	Five prevention tips
High fever     Swollen lymph glands     Muscle, joint and abdominal pains     Nose bleeding     Excessive vomiting	Eliminate standing water     Use good mosquito repellent     Clean and monitor gradens well     Wear protective clothing     Use Guppi fish in ponds

For more information: Dengue prevention

Figure 1: The web page

Figure 2: The HTML Source code

Select the correct tags for the labels ①-⑩ of Figure 2 from the list given below. Write down each label number and the corresponding HTML tag.

List: {h2, head, href, img, ol, p, td, th, tr, ul}

[see page fourteen

46

5. Consider the following spreadsheet segment which consists of marks obtained by 40 students in a class for their three subjects at a school term test. Students' marks for Subject 1, Subject 2 and Subject 3 are shown in columns C, D and E respectively. This spreadsheet is used to compute the Z-score for each subject of each student and the final Z-score for each student.

1000	J A	В	C	D	E	AND THE RE	G	H	
1	DATE OF THE PARTY			Marks			Z-Score		Final
2	No.	Name	Subject 1	Subject 2	Subject 3	Subject 1	Subject 2	Subject 3	Z-score
3	1	Kamal	27	34	43	-1.1081	-1.0146	-0.4915	-0.8714
4	2	Raju	45	50	62	0.0382	0.0879	0.8284	0.3182
5	3	Rauf	34	40	60	-0.6623	-0.6012	0.6895	-0.1913
6	Δ	Krishna	66	70	70	1.3756	1.4660	1.3842	1.4086
l verte		Kristitia		near them to			ger out to	2100.12	2.100

41	39	Roshan	84	73	85	2.3565	1.6417	2.1601	2.0528
41	39	Roshan Khan		page Appendix	ngsal no	2.3565	separ sour se		andri (2)
M. Salah	39	Roshan Khan marks	84	73	85	2.3565 -0.2936	1.6417	2.1601	2.0528

- (i) Write down the formula that should be entered in cell C43 to calculate the average mark for Subject 1 in the form of =function1(cell1:cell2)
- (ii) If this formula is copied to cells D43 and E43, write down the formula that will appear in cell D43.
- (iii) The Z-score for a subject of a student can be calculated by using the following formula:
  Z-score = (student's marks for the subject average marks for the subject) / SD value of the subject

The SD values required for each subject are given in cells C44, D44 and E44 respectively.

(a) Write down the formula that should be entered to cell F3 to calculate Kamal's Z-score for Subject 1.

Note that this formula is to be copied to calculate the Z-scores for Subject 1 of all other students too.

- (b) If this formula is copied to cell range F4 to F42, write down the formula that will appear in cell F42 which shows Khan's Z-score for Subject 1.
- (iv) The final Z-score of a student is the average of the three Z-scores for the subjects. Write down the formula to calculate the final Z-score value of Kamal in cell I3 using only the functions COUNT and SUM.
- (v) Assuming that student Z-score values for the three subjects and the final Z-score for all students have been calculated, write down a formula that should be entered in cell I44 to find the highest final Z-score value in the form of =function2(cell3:cell4).

[see page fifteen

6. (i) Following table shows five stages of the systems development life cycle (SDLC) with an activity for each stage.

Stage of SDLC	Activity	
Identification of requirements	<b>⊗</b>	
B	Designing interfaces	
©	Writing the computer programs	
Testing and debugging	<b>(D)</b>	
Œ	Adding new features to the system	

Identify the suitable choice for each of the labels  $\widehat{\mathbb{A}} - \widehat{\mathbb{B}}$  from the labelled list  $(\widehat{\mathbb{P}} - \widehat{\mathbb{T}})$  given below. Write down each label in the table and its matching choice label.

List: {P - Coding the solution, Q - Designing the solution, B - Integration testing, S - Interviewing, T - Maintenance of the system}

- (ii) The book shop in your school operates with a computer-based information system. When a student goes to buy stationery, the clerk enters the item code and the quantity of each item the student wants to buy. The system then calculates the total cost for each item and the total bill value. Then the system displays the final bill on the screen and prints it.
  Using the above scenario answer the following questions.
  - (a) Write down one input.
  - (b) Write down one process.
  - (c) Write down one output.
- (iii) Identify the correct term from the given labelled list (P-T) for each of the following scenarios labelled A-D. Write down the scenario label and the matching term label.
  - Sunil is developing a library management system and told the teacher that she will not be able to use any part of the system until the entire system is fully developed.
  - B After completion of a small information system for the school canteen, Azma decided to stop the existing system and operate the new system.
  - © After monitoring the new student information system initially introduced to Grade 6 classes, the Principal plans to introduce the system to the other classes of the school.
  - D The initial system was developed with two input screens and one report. Based on the user feedback two more input screens and reports were added to the system. More features are to be added based on further user feedback.

List: {P - direct deployment, Q - iterative software development, R - phased deployment, S - pilot deployment, T - waterfall model}

(iv) List two benefits of a computer-based information system over a manual information system.

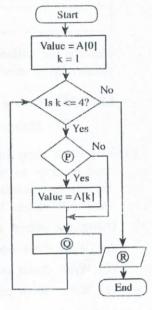

7. (i) Consider the following array A containing five integer values.

A[0]	A[1]	A[2]	A[3]	A[4]
80	100	70	65	95

(a) Write the output of the following pseudo-code when it is executed on the above array A.

Value = A[0] k = 1 WHILE (k<=4) IF A[k] < Value THEN Value = A[k] ENDIF k=k+1 ENDWHILE DISPLAY Value END

(b) Identify and write down the correct statements for P, Q and R in the flowchart on the right which is drawn using the above pseudo-code.

(c) Redraw the array A and its contents after the following assignments are carried out on the array A.

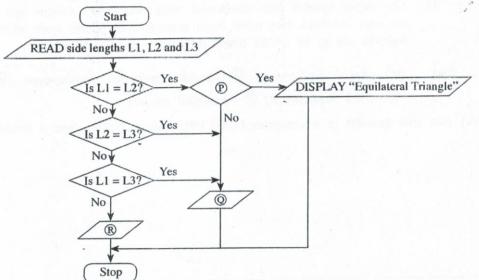

A[1] = 45

A[2] = 88

A[4] = 72

(ii) A triangle with all three sides of equal length is called an **equilateral** triangle. A triangle with two sides of equal length is called an **isosceles** triangle. A triangle with all sides of different lengths is called a **scalene** triangle.

The following flowchart with labels  $\mathbb{P}$ ,  $\mathbb{Q}$ ,  $\mathbb{R}$  determines if a given triangle is an equilateral, isosceles or a scalene triangle.

Write down the relevant statements for the labels P, Q and R.
